

Welcome to the Society for Conservation GIS

MISSION, VISION, VALUES

Society for Conservation GIS

A global community using geospatial technology for conservation.

The Society for Conservation GIS (SCGIS) is an all-volunteer, U.S. based 501(c)3 non-profit organization. We are an organization committed to advancing conservation GIS globally by building and supporting a vibrant community of conservation GIS practitioners.

Mission

To support and grow an inclusive global community using geospatial technology for conservation of biodiversity, natural environments, and cultural heritage.

Vision

We envision a sustainable planet fostered by a global conservation GIS community supported through the exchange of scientific knowledge, tools, and best practices.

Values

- Passionate about protecting Earth's natural environment
- Supportive of integrated conservation efforts that benefit communities, natural capital, and human livelihoods
- Respectful, professional, inclusive, and collaborative
- Multicultural, diverse, and global
- Supportive of different geospatial tools, software types, and approaches
- Committed to building conservation GIS capacity worldwide
